Certificate of Compliance for type II and III amber soda-lime glass

Refit Abdi Ibrahim Bac

We certify that our amber node-time glass containers types II and III, meet the chemical characteristics specified in the European Pharmacopels 5th edition, and in the United States Pharmacopels USP XXVIII edition.

The base composition, expressed as oxide percentage, is the following:

9iO2	10/0	69		73
ALO,	%	2.0	•	3.0
CaO+MgO	%	9	-	12
B ₂ O ₁	%	0		\$
Ne20 + K20	%	13	•	15
Fe ₂ O ₃	96	0.2	•	0.3
S	%	< 0.1		

Besides we certify that the light transmission is within the limit stated in the above Pharmacopeias (10 % in the range from 290 to 450 mm).

The amber colour is due to the corresponents FeeO, and S.
